

Ulnar Abutment Brace™

An original approach to a
real Pain in the Wrist

Gel pad against the Ulnar Styloid

Different gel buttress configurations for best fit against Ulnar Styloid

Fluoriscan

Without brace

With brace

Through comfortable gel buttressing and compression, the UAB helps stabilize the DRUJ, decreasing pain and increasing function.

Treating ulnar side wrist pain requires:

- Compression without constriction
- Comfort for compliance

Conditions/diagnosis:

- TFCC injury
- DRUJ dysfunction
- Ulnar abutment
- Wrist sprain
- Ulnar impaction syndrome
- Ulnar sided wrist pain
- Post-operative support (i.e. following distal radius ORIF)
